Seat Belt Survey Instructions

In support of Washington's September Click it or Ticket campaign, we are asking law enforcement agencies to coordinate and carry out at least one set of pre/post 100-car seat belt use surveys in their area.

Many of you have done these surveys before but if you haven't, the idea is fairly simple. A pre-survey is done to assess the seat belt use rate before the media and enforcement begins and then a post-survey to measure the success of the campaign. We would ask that you follow these guidelines:

- 1) Please do the survey in high-volume location that is both safe and representative of your city or county.
- 2) Count all drivers and right front seat passengers observed using **shoulder belts** as a YES on the form.
- 3) Misuse of the belt system, such as wearing the shoulder belt behind the back or under the arm should be counted as a NO on the form.
- 4) Pre-and post surveys must be performed at the same location, on the same day of the week and at the same time of day.
- 5) The pre-survey should be completed no later than September 4 (before the statewide media campaign begins) and the post survey should be done as close to the completion of your enforcement activities as possible (ideally September 26, 27, or 28.)

These surveys do not need to be done by police personnel. Many agencies use volunteers who understand the guidelines listed above and the importance of safety during the observations.

Both the pre and post surveys should be submitted with the grant reimbursement packet.

If you have any questions regarding this process, please contact Angie Ward, Occupant Protection Program Manager at the Washington Traffic Safety Commission, (360) 753-0877, award@wtsc.wa.gov.

Thank you!
